JOBS REVIEWED	RECOMMENDED	NEED REVIEW

Candidate summary

Target roles Junior Data Analyst, BI Analyst, Reporting Analyst
Experience 2.0 years total
Education Bachelor of Science Business Analytics
Documented skills SQL, Python, Power BI, Data cleaning, Data analysis, Reporting, Dashboard development, Stakeholder communication

SEARCH SCOPE

Search themes: Junior Data Analyst; BI Analyst; Reporting Analyst · Job sources: arbeitnow, himalayas

Match scores are indicative evidence-alignment measures. They are not hiring probabilities and do not verify that every employer qualification is met. "Not documented" means the profile did not include evidence; it does not establish that the candidate lacks the qualification. An explicit mismatch is identified separately only when the recorded evidence supports that conclusion.

EVIDENCE-SUPPORTED OPPORTUNITIES

Recommended roles

No roles met the current recommendation criteria. This is a completed result, not a failed run. Potential matches and their review reasons are listed next.

A recommendation is an evidence-based lead. Review any listed qualifications before treating it as confirmed fit.

TRANSPARENT SHORTLIST

Potential matches requiring review

These roles did not qualify as recommendations. Scores remain indicative; the review signal explains what needs checking. Full recorded evidence is preserved in the appendix.

ROLE	SCORE	WHY IT NEEDS REVIEW
Senior Data Analyst SE Ranking	**85/100**	Senior-level recommendation requires substantial relevant experience; the profile reports 2 total years and documents no prior senior-level role.
Interim Senior BI Analyst (All Genders) Shiftmove	**57/100**	Senior-level recommendation requires substantial relevant experience; the profile reports 2 total years and documents no prior senior-level role.
Junior Software Developer - Python & Web Applications (m/f/d) Statista	**53/100**	Eligibility in required country/countries (DE) is unknown.
IT Support Analyst Goodlord	**53/100**	Eligibility in required country/countries (DE) is unknown.
Senior Data Analyst Namecheap, Inc.	**51/100**	Senior-level recommendation requires substantial relevant experience; the profile reports 2 total years and documents no prior senior-level role.
Product Analyst - Pendo (Europe, Remote) Intel 471	**51/100**	Senior-level exception requires relevant-experience evidence of at least 70/100; current evidence is 50/100.
Senior Analytics Engineer-Commercial Intelligence Emma	**50/100**	Senior-level recommendation requires substantial relevant experience; the profile reports 2 total years and documents no prior senior-level role.

EVIDENCE & IMPLICATIONS

Career intelligence

Market research is available in this report.

Grounded synthesis is available in this report.

Labour-market perspective

The demand for skilled professionals in data analytics and business intelligence roles is significant, particularly in sectors that are increasingly reliant on data-driven decision-making. However, specific demand levels for junior roles versus senior roles cannot be established from the available sources, which primarily discuss broader trends in skill requirements and labor market dynamics.

Germany - 2025 Skills forecast - European Centre for the Development of Vocational Training (Cedefop) - 2025 - PDF page 9 [source]

Germany - Digital Decade Country Report 2026 - European Commission - 2026 - PDF page 12 [source]

Personalized career perspective

The candidate has approximately 2 years of experience in data reporting and analysis, with documented skills in SQL, Python, and Power BI, which align well with the requirements for junior data analyst roles. Their experience includes maintaining dashboards and communicating findings to stakeholders, which is relevant for positions in business intelligence and reporting.

Research & classification

Company research

Company research was not run because no roles qualified for recommendation.

No company research results are available for this run.

ESCO skill and occupation references

ESCO lookup was not run because no roles qualified for recommendation.

No ESCO concepts were returned for this run.

DECISION SUPPORT

Review evidence appendix

The following entries preserve the recorded review reasons and requirement evidence. "Not documented" means the profile supplied no evidence; it is not a confirmed mismatch. Only an explicitly recorded mismatch is described as such.

1. Senior Data Analyst — SE Ranking

Indicative score: 85 / 100 · Evidence coverage: 100%

Review context

• Senior-level recommendation requires substantial relevant experience; the profile reports 2 total years and documents no prior senior-level role. This is not a conclusion that the candidate cannot perform the work.

Material requirements from the posting

Experiment design and analysis experience — priority not specified — Not documented — verify

Posting evidence: Design and assess experiments — judge whether an A/B test is viable in the first place, design it properly when it is, and build a credible pre/post or quasi-experimental read when it isn't

Profile evidence is not documented; this is not a confirmed mismatch.

Senior-level professional experience — required — Not documented — verify

Posting evidence: Solid senior-level experience as a data analyst in SaaS — you know NDR, expansion, contraction and MRR as things you've modelled, not terms you've heard

Profile evidence is not documented; this is not a confirmed mismatch.

SaaS analytics experience — required — Not documented — verify

Posting evidence: Solid senior-level experience as a data analyst in SaaS — you know NDR, expansion, contraction and MRR as things you've modelled, not terms you've heard

Profile evidence is not documented; this is not a confirmed mismatch.

SQL qualification — required — Partly documented — verify level/context

Posting evidence: Expert SQL , Python for the work SQL can't do, and comfort in Looker (or a close equivalent) for getting insight in front of people

Profile evidence: Profile mentions 'SQL'; the job-specific level or context is not independently verified.

Advanced data modeling / analytics engineering experience — required — Not documented — verify

Posting evidence: Strong data modelling and analytics engineering — you build the layer everyone else relies on rather than just querying it, with real dbt mileage

Profile evidence is not documented; this is not a confirmed mismatch.

dbt qualification — required — Not documented — verify

Posting evidence: Strong data modelling and analytics engineering — you build the layer everyone else relies on rather than just querying it, with real dbt mileage

Profile evidence is not documented; this is not a confirmed mismatch.

2. Interim Senior BI Analyst (All Genders) — Shiftmove

Indicative score: 57 / 100 · Evidence coverage: 100%

Review context

• Senior-level recommendation requires substantial relevant experience; the profile reports 2 total years and documents no prior senior-level role. This is not a conclusion that the candidate cannot perform the work.

Material requirements from the posting

Senior-level professional experience — required — Not documented — verify

Posting evidence: You bring extensive experience in BI or analytics , including at least three years working at a senior level

Profile evidence is not documented; this is not a confirmed mismatch.

Tableau qualification — required — Not documented — verify

Posting evidence: You have expert-level Tableau dashboard development skills, including experience redesigning dashboards for executive audiences

Profile evidence is not documented; this is not a confirmed mismatch.

SQL qualification — required — Partly documented — verify level/context

Posting evidence: You have strong SQL skills and hands-on experience working with Snowflake

Profile evidence: Profile mentions 'SQL'; the job-specific level or context is not independently verified.

Snowflake qualification — required — Not documented — verify

Posting evidence: You have strong SQL skills and hands-on experience working with Snowflake

Profile evidence is not documented; this is not a confirmed mismatch.

dbt qualification — required — Not documented — verify

Posting evidence: You have practical experience with dbt, including building and maintaining data models, tests and documentation

Profile evidence is not documented; this is not a confirmed mismatch.

Salesforce qualification — preferred — Not documented — verify

Posting evidence: Experience working with Salesforce, HubSpot or NetSuite data models

Profile evidence is not documented; this is not a confirmed mismatch.

3. Junior Software Developer - Python & Web Applications (m/f/d) — Statista

Indicative score: 53 / 100 · Evidence coverage: 100%

Review context

• Eligibility in required country/countries (DE) is unknown.

• Career-direction alignment is weak: The job title does not identify the candidate's target function or a supported adjacent transformation-delivery role.

Material requirements from the posting

AWS qualification — required — Not documented — verify

Posting evidence: Work closely with our senior Data Engineer and other experienced data professionals who build our analytics products and pipelines, learn hands-on about our AWS cloud environment and ETL processes, and help build reliable data pipelines and PostgreSQL queries

Profile evidence is not documented; this is not a confirmed mismatch.

Python qualification — required — Partly documented — verify level/context

Posting evidence: Solid hands-on skills in Python, gained through professional work, internships, research, or your own projects.

Profile evidence: Profile mentions 'Python'; the job-specific level or context is not independently verified.

4. IT Support Analyst — Goodlord

Indicative score: 53 / 100 · Evidence coverage: 85%

Review context

• Eligibility in required country/countries (DE) is unknown.

• Career-direction alignment is weak: The job title does not identify the candidate's target function or a supported adjacent transformation-delivery role.

5. Senior Data Analyst — Namecheap, Inc.

Indicative score: 51 / 100 · Evidence coverage: 100%

Review context

• Senior-level recommendation requires substantial relevant experience; the profile reports 2 total years and documents no prior senior-level role. This is not a conclusion that the candidate cannot perform the work.

• Senior-level exception requires relevant-experience evidence of at least 70/100; current evidence is 25/100.

Material requirements from the posting

At least 8 years of experience — required — Explicit mismatch in supplied evidence

Posting evidence: You will have 5-8 years of experience in analytics, with real experience in SaaS, subscription or e-commerce

Profile evidence: Profile reports 2 years; posting states at least 8.

SaaS analytics experience — required — Not documented — verify

Posting evidence: You will have 5-8 years of experience in analytics, with real experience in SaaS, subscription or e-commerce

Profile evidence is not documented; this is not a confirmed mismatch.

Experiment design and analysis experience — required — Not documented — verify

Posting evidence: You have experience with Python for analysis, solid statistics and A/B testing

Profile evidence is not documented; this is not a confirmed mismatch.

Tableau qualification — priority not specified — Not documented — verify

Posting evidence: You have working experience with Tableau and/or Looker / Looker Studio

Profile evidence is not documented; this is not a confirmed mismatch.

Looker qualification — priority not specified — Not documented — verify

Posting evidence: You have working experience with Tableau and/or Looker / Looker Studio

Profile evidence is not documented; this is not a confirmed mismatch.

Language proficiency: English — priority not specified — Not documented — verify

Posting evidence: You have fluent English (C1+) and are confident presenting to senior leadership

Profile evidence is not documented; this is not a confirmed mismatch.

dbt qualification — preferred — Not documented — verify

Posting evidence: Experience with Trino or federated queries, dbt, LLM tools in your analytics workflow, or a background in domains, hosting or web infrastructure is a plus

Profile evidence is not documented; this is not a confirmed mismatch.

6. Product Analyst - Pendo (Europe, Remote) — Intel 471

Indicative score: 51 / 100 · Evidence coverage: 100%

Review context

• Senior-level exception requires relevant-experience evidence of at least 70/100; current evidence is 50/100.

• Career-direction alignment is weak: The job title does not identify the candidate's target function or a supported adjacent transformation-delivery role.

Material requirements from the posting

At least 4 years of experience — priority not specified — Explicit mismatch in supplied evidence

Posting evidence: 2-4 years of demonstrable experience in Product Operations, Product Analytics or a similar role.

Profile evidence: Profile reports 2 years; posting states at least 4.

7. Senior Analytics Engineer-Commercial Intelligence — Emma

Indicative score: 50 / 100 · Evidence coverage: 100%

Review context

• Senior-level recommendation requires substantial relevant experience; the profile reports 2 total years and documents no prior senior-level role. This is not a conclusion that the candidate cannot perform the work.

• Senior-level exception requires relevant-experience evidence of at least 70/100; current evidence is 40/100.

• Career-direction alignment is weak: The job title does not identify the candidate's target function or a supported adjacent transformation-delivery role.

Material requirements from the posting

At least 5 years of experience — required — Explicit mismatch in supplied evidence

Posting evidence: At least 5 years of experience in Analytics Engineering Strong SQL and dbt skills Solid Python skills.

Profile evidence: Profile reports 2 years; posting states at least 5.

Advanced data modeling / analytics engineering experience — required — Not documented — verify

Posting evidence: At least 5 years of experience in Analytics Engineering Strong SQL and dbt skills Solid Python skills.

Profile evidence is not documented; this is not a confirmed mismatch.

Python qualification — required — Partly documented — verify level/context

Posting evidence: At least 5 years of experience in Analytics Engineering Strong SQL and dbt skills Solid Python skills.

Profile evidence: Profile mentions 'Python'; the job-specific level or context is not independently verified.

SQL qualification — required — Partly documented — verify level/context

Posting evidence: At least 5 years of experience in Analytics Engineering Strong SQL and dbt skills Solid Python skills.

Profile evidence: Profile mentions 'SQL'; the job-specific level or context is not independently verified.

dbt qualification — required — Not documented — verify

Posting evidence: At least 5 years of experience in Analytics Engineering Strong SQL and dbt skills Solid Python skills.

Profile evidence is not documented; this is not a confirmed mismatch.
